UEQ: Chapter 1 * (1.4 - 1.6)* *How do variables help us model real-world situations?* *How do we solve linear equations?* *How do we solve linear inequalities?* *How do we solve absolute value equations?*	***AA Review. Equations and Inequalities*** *AA1.* Solve linear equations and solve problems by writing equations *AA2.* Solve and graph linear inequalities. Write and solve compound inequalities. ***AA3. Write and solve equations and inequalities***	**LT1:** I can solve linear equations. **LT2:** I can solve problems by writing equations. **LT3:** I can solve linear inequalities. **LT4:** I can graph linear inequalities. **LT5:** I can write and solve	**CA=Chapter 1 Test AA1-AA3**	

How do we solve absolute value inequalities?	*involving absolute value.*	compound inequalities.	
AA Review. Equations and Inequalities	8.2.4.1	**LT6:** I can write and solve equations using absolute value.	
AA1.. Solving Equations	8.2.4.2		
AA2. Solving Inequalities	8.2.4.3	**LT7:** I can write and solve inequalities using absolute value.	
AA3. Absolute value equations and inequalities	8.2.4.4		
	8.2.4.5		
🛡️🛡️🛡️🛡️🛡️🛡️ *UEQ: Chapter 2 (2.1,2.3,2.4, 2.7, 2.8)*	8.2.4.6		**Quiz 2.1, 2.3, 2.4, and Piecewise** 🖥️ **CA=Chapter 2 Test A1-A5**
• *How do we graph and identify functions?*		**LT1:** I can determine if a relation of function.	
• *How do we graph and write linear and piecewise functions?*		**LT2:** I can determine the domain and range of a function or a relation.	
• *How do we graph absolute value functions?*	9.3.4.6*A. Functions, Relations, and Graphs Graph relations. Write and identify functions.*	**LT3:** I can graph linear equations by using slope-intercept form or using the intercepts.	
• *How do we analyze translations, stretches, shrinks, and reflections?*	*A1.* Relations and functions *A2.* Graph linear equations. Write equations	**LT4:** I can graph and write a piecewise function.	

● *How do we graph linear and absolute value inequalities?* ● *How do we combine functions with the basic four operations and compositions.* ***A. Functions, Relations, and Graphs*** *A1. Relations and functions* *A2. Linear equations* *A3. Absolute value functions and graphs* *A4. Families of functions* *A5. Two-variable inequalities* *A6. Simplifying functions using the basic four operations and compositions*	of lines. Graph piecewise functions & write equations. **A3.** Absolute value functions and graphs Graph absolute value functions **A4.** Families of functions Analyze translations **A5.** Two variable inequalities Graph linear inequalities and absolute value inequalities. **A6.** Use the four basic operations to combine functions and composite functions. 9.2.1.1-9.2.1.5 9.2.1.8 9.2.1.9 9.2.2.1 9.2.2.3 9.2.2.6 9.2.3.1 9.2.3.7 9.2.4.4 9.2.4.5 9.2.4.6 9.3.3.1	**LT5:** I can evaluate a piecewise function. **LT6:** I can write an equation of a line given two points in slope-intercept form, point-slope form, and standard form. **LT7:** I can use perpendicular and parallel lines to find equations of lines. **LT8:** I can convert between all forms of a line (slope-intercept form, point-slope form, and standard form.) **LT9:** I can evaluate and simplify using function notation. **LT10:** I can graph absolute value functions. **LT11:** I can identify the vertex of an absolute value function.	

9.3.4.4 9.3.4.6	**LT12:** I can translate an absolute value function and describe the translation in words. **LT13:** I can graph linear and absolute value inequalities. **LT14:** I can use the four basic operations to combine functions and composite functions.

radicals and rational exponents?

- *What do the graphs of a square root and cube functions look like?*
- *How do transformations change the radical function graphs & their equations?*

F. Simplifying &/or solving radical functions

F1. Simplify & find nth roots of radical expressions

F2. Multiply & divide radical expressions; including binomial radical expressions

F3. Add & subtract radical expressions

F4. Simplify expressions with rational exponents

F5. Solving square root and other radical equations

F6. Graphing square root and cube root functions

denominator).

F4. Apply rules to simplify expressions and numbers with rational exponents and convert to & from radical form.

F5. Solve equations with square root and other radicals (like rational exponents) and check for extraneous solutions.

F6. Sketch graphs of square and cube root functions. Compare how they translate vertically and horizontally with changes in the equation.
