

Instructions for Opening Lockers

Turn the knob three (3) complete turns to the right (clockwise) until you reach the first number in your combination...

Go left (counter clockwise) past the first number to the second number in your combination...

Then turn right (clockwise) to the third number in your combination and your locker should open!

When you are done at your locker, be sure to give the dial a quick spin around to clear the locker combination.

Lockers are the property of the school district. Each student is assigned a locker and is responsible for its condition and contents. Please be sure to use your locker only and do not share your locker combination with anyone for your own protection.
